

# PPE: Personal Protective Equipment

In these times of crises, having access to Personal Protective Equipment (PPE) is vital to ensure one's personal health. At Hatton, we have partnered up with China in order to allow easy access to these PPE Products to the public. All of our PPE products can be confirmed on US Government sites as well as approval lists.

Our partner is a wholly state-owned company that is approved by the State Council, and they have 8 national research and development (R&D) institutions. Not only that, they also own 82 provincial R&D institutions, 8 academicians' workstations and 6 postdoctoral workstations. On top of that, our partner also has 110 national science and technology awards under their belt, not to mention their 2293 provincial and ministerial-level scientific and technological progress awards.

Here, we have added a list of these FDA Approved and Certified PPE products that we are offering during this time.

## 1. Disposable Face Masks

At Hatton, we offer multiple types of face masks for our clients. These include N95, KN95 as well as FFP2. These masks are both compliant to the US standards and the European standards of face masks. All of our masks are NIOSH, SGS and ECM tested, and are on the US Government approval list. Our masks are intended for medical use, and can be ordered in bulk to be shipped directly to our clients.

## 2. Nitrile Examination Gloves

Hatton offers medical grade, single use Nitrile Examination Gloves. Our clients will be able to choose between Powder and Non-Powder gloves as well.

### 3. Face Protective Shield

Face Protective Shields meant for hospital use are offered as well. These FDA Certified face shields come in boxes of 24. It provides excellent protection against the potential contamination from blood pathogens, bodily fluids or harmful chemical splashes. Our face shields are anti-fog, anti-static, and made with no-glare lens. On top of that, these face shields are lightweight and comfortable to wear, and can be put on with ease.

### 4. IR Thermometer

Our IR (Infrared) Thermometer is FDA certified and is battery operated, providing ease of use. Not only that, it is safe as it is a contactless thermometer, thus reducing the waste of single use plastics as well as the risk of contamination from patients.

Proof of UPS and DHL Delivery can and will be provided upon agreement.

### 5. Protective Safety Goggles

The safety goggles that we provide are anti-fog and anti-scratch, thus providing clear vision for your medical personnel. On top of that, our goggles also provide protection for the eyes from harmful UV rays. As such, they can lower the risk of your medical team from contracting eye

issues such as cataracts, corneal sunburn and skin cancer around the eyelids.

Our safety goggles are also impact resistant, thus it is less likely to break when dropped.

## 6. Medical Caps and Gowns
